Re: System water plan review

Dear Water Provider:

The Arizona Department of Water Resources (ADWR) has completed its review of your 2012 system water plan and has determined that your plan meets the objectives set forth in *Arizona Revised Statutes* § 45-342. We apologize for the delay in getting back to you regarding this matter.

Please note that ADWR bases its compliance determination on the basic outline of system water plan requirements provided in statute. It is the water provider's responsibility to make sure the plan is realistic, practical, and technically sound for the water system and the community. The goal of the system water plan should be to reduce drought vulnerability through a strong water supply plan and conservation component, as well as ensure that the system is prepared to respond to a drought emergency.

System water plans should be implemented and evaluated prior to the next submittal so that appropriate revisions and improvements can be made. Updates are due to ADWR every five years. For further assistance, you can also view several plans chosen as good "models" to consider at http://www.azwater.gov/AzDWR/StatewidePlanning/drought/CWS_spotlight.htm as well as a fact sheet on conservation and drought planning.

Your next system water plan update will be due to ADWR by January 2, 2018. (Note that if you choose to make changes to your plan before this time, your plan must be submitted within 60 days of the time the revisions are made.) If you have any specific questions about your system water plan or ADWR's review, please contact the AMA Planning & Data Management Section at (602) 771-8585 or by e-mail at ecws@azwater.gov.

Sincerely,
